### To whomsoever it may concern

**Sub: Defense Logistics Agency (DLA) amendment to AAN-U-17-246 removing ITT Cannon, LLC from the DLA Land and Maritime Qualified Products List (QPL) Program, effective July 5, 2017**

On July 11, 2017 the Defense Logistics Agency (DLA) published an amendment to AAN-U-17-246 removing ITT Cannon, LLC from the DLA Land and Maritime Qualified Products List (QPL) Program, effective July 5, 2017, for products under MIL-DTL-38999, MIL-DTL-26482, MIL-DTL-83723, MIL-DTL-24308, MIL-DTL-83733, and MIL-DTL-83513.

Elma Electronic Inc (EEI) is a supplier of customized enclosures to various DoD customers in the Mil- Aerospace industry. Some of these customized enclosures, depending on the customer and the design requirements incorporate Mil connectors of various types from different manufacturers

Consequent to the above alert issued by the DoD, EEI has taken prompt action by way of reaching out to the distributor base. The suppliers were alerted to provide details of purchase history as far back as possible, up to 2008.

EEI has since received responses on all ITT Cannon's products shipped against our PO's from all authorized distributor and the raw data is being processed. The history relevant to the affected connectors in question will have to be isolated and then correlated to the products that EEI has shipped to various customers. This effort is time consuming involving review of part transactions and product build records. We expect to have this completed in the next 6-8 weeks and results compiled to share with the customers

Sincerely
