

FAST SYSTEM PLATFORM FOR HIGH SPEED TRAINS

SIGNALING SYSTEMS

Since 2001, The Insigma Group, headquartered in China, has developed from a high-tech company with its inception at Zhejiang University to a Group with companies in various sectors, including software outsourcing, railways, IT solutions, energy saving, and emission-reduction projects.

The customer-specific 7U system platform by Elma China was selected by Insigma Group for use in high-speed trains in China.

The system monitors safety and reliability by continuously monitoring speed, vibration, pressure, temperature and humidity in real-time.

ABOUT ELMA

Elma Electronic AG consistently impresses with innovative, customer-specific solutions and developments that meet the highest standards of quality, reliability and performance.

Electronic Packaging

We are a leading provider of electronic packaging solutions. Our portfolio extends from components, storage solutions, backplanes and chassis platforms through to fully integrated systems. Furthermore we offer enclosure solutions as well as a frontpanel service with digital printing.

HMI and Rotary Switch Solutions

Our rotary switch, selection switch, encoding switch, encoder, and HMI portfolio offer our customers comprehensive and high-quality control solutions. Our customers' millions of rotary applications, proven over decades of use, are a testimony to our success story.
